Binary Stream and TrinDocs Announce Partnership to Streamline Multi-Entity Invoice Automation

Burnaby, BC – May 5, 2025 — Binary Stream, a leading provider of enterprise-grade Microsoft Dynamics 365 solutions, is pleased to announce a new partnership with TrinDocs, a powerful accounts payable (AP) automation platform. This partnership will deliver an integrated solution that simplifies invoice processing and ensures accurate document routing across multiple entities — transforming financial operations for growing businesses.

By combining Binary Stream's **Multi-Entity Management (MEM)** with TrinDocs' AP automation technology, the partnership enables businesses to scale faster by eliminating manual tasks and improving data accuracy across their ERP systems.

"Our Multi-Entity Management solution empowers businesses to centralize operations while maintaining control over individual entities," said Lak Chahal, CEO at Binary Stream. "By partnering with TrinDocs, we're taking that even further — helping our customers eliminate manual AP processes, minimize errors, and scale faster."

Supporting organizations managing complex, multi-entity structures — particularly those in industries like professional services, distribution, and property management — this partnership will enable users to:

- **Automate invoice processing** across multiple entities, reducing manual data entry.
- **Ensure accurate document routing** with pre-configured, customizable workflows.
- **Gain real-time visibility** into multi-entity AP data from a centralized system.
- **Scale effortlessly** with a solution designed to grow alongside the business.

"TrinDocs is proud to partner with Binary Stream to serve clients with multiple entities, across a range of ERPs, with tailored AP automation solutions that are as unique as the businesses themselves," said Jeremy Prichard, Senior Director of Sales & Marketing at TrinDocs. "With prebuilt integrations, implementing TrinDocs with Multi-Entity Management is quick and easy. And so is helping businesses scale growth, with TrinDocs and MEM working together for clients."
